-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

AA

This action is in response to applicants' amendment of 10 January 2005. The amendments to the specification have overcome the objections to the disclosure. The amendments to the claims have overcome the 35 USC 112 rejections.

Claims 127 and 243 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims are duplicate claims. Applicant is advised that should claim 127 be found allowable, claim 243 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 119 and 122 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 21, 23-27 and 34 of U.S. Patent No.

Art Unit: 1755

6,210,604. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed process of the patent suggests that claimed in this application.

Claims 119, 122, 126-127, 240 and 241 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 54, 61, 64-67, 76, 79, 83, 85, 86 and 89 of U.S. Patent No. 6,193,908. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed process of the patent suggests that claimed in this application.

Claims 119-122, 126, 127 and 240-242 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 32-33, 37 and 43 of U.S. Patent No. 6,153,123. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed process of the patent suggests that claimed in this application. While the claims in the patent do not teach milling the resulting phosphor particles, one of ordinary skill in the art would have found it obvious to mill the resulting particles to break up any agglomerates and/or to reduce the particle size to a desired smaller size. While the claims in this patent do not specifically teach a sulfur containing phosphor composition, one of ordinary skill in the art would have found it obvious to produce any known sulfur containing phosphor by the taught process, such as those in claims 240-242.

Applicants' comments with respect to the submission of a Terminal Disclaimer upon indication of otherwise allowable subject matter are noted.

Art Unit: 1755

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
